95,827 gallons; whisky, 37,239 gallons; brandy, 320,281 gallons; gin, 11,492 gallons; liqueurs, 4761 gallons; cigars, 11,492 gallons.

THE Electoral Act Amendment Bill was read a third time in the Legislative Assembly, by a majority of 28 votes to 9, on the 20th of last month; and the second reading of the bill was agreed to after two nights' debate in the Council by 19 votes to 3. Several members of

The arrival in the colony of a number of ex-convicts from Western Australia, and the simultaneous occurrence of robberies with violence has led to the passing of an Act for the more effectual suppression of garting. The measure is similar to its provisions to statutes passed in the United Kingdom and some of the

[illegible]

That "the right of the Governor to pardon on the advice of his Ministers here is distinctly recognized, and has for many years been acted on as a matter of course." It may be said that the following papers go to show that the Governor has almost invariably acted upon his own judgment, and that the advice of Ministers has neither been sought nor offered. The circular of Lord Kimberley, dated 1st November, 1871, states—

The Governor, as invested with a portion of the prerogative of pardon, is authorized to examine personally each case in which he is called upon to exercise the power entrusted to him, although in a colony under responsible government he will of course pay due regard to the advice of his Ministers, who are responsible

THE main item of interest for the present month has been the appointment of four, out of the eight, Wardens who are to act under the new Mining Act. These gentlemen are the three Commissioners in charge (North, South, and West) and Mr. Dalton, Police Magistrate at Fortke. These appointments have been made for the purpose of making the necessary arrangements for the election of members of the Board. Instructions for conducting the election have been issued, the gold-fields being divided into nine districts, each to return a member to the Board; and the election is to take place on the 15th of the present month. A good deal of interest is taken in the matter, and many candi-

ries are offering. The news this month is somewhat meagre, though on the whole it is anything but encouraging, the new alluvial workings that are being continually opened up, both at Parkes and Gulbong, holding out great inducements to miners. So much is this the case that hundreds of men are flocking to the new diggings, and, being experienced diggers, are a valuable acquisition to the field.

Accounts from Hill End are not especially lively. The parcel of stone crushed to test the new Elmhurst is now working on west and south, and the new parcel of stone from there was but 16 cwt. of it, being all that could be brought up, as the lot had to be carried part of the way up the hill on the men's shoulders before the pack horses could be reached. The quantity in the front workings in the corner of Peace point might be enough to give a dividend of 100 tons. This stone was only got out on speculation in hope of coming on a patch, and not only paid the cost of getting it, but between £400 and £500 in addition. Some of this stone is of a very fine quality, but the rest is of a extraordinary disturbance, and the veins and cleavages between them, resulting in a great "blow" of the middle vein and then of the hanging wall vein, upset the expected results, the stone from the "blows" almost swamping the rest.

A distinct "blow" completely horizontal, with a slight rise to the north, gave the hanging wall vein a return to its natural size, good stone is again expected above the break. The Frenchman is still at work stopping and driving, and will shortly recommence sinking. The stone is not so good now as it has done. The stone raised by the Tribolet is of a good quality, Chappell's, went 32 cwt to the 8 tons, or at the rate of 4 oz. to the ton. This was much better than was expected. Fischer Beards is idle. All hands have been discharged. Various reasons are given for this, and there is a suspicion of a greyness stealing.

Our correspondent at Parkes gives us the following account of the new rush at Goobang Creek, and of the other leads now working at Curingaj:—"In mining everything looks still *confair de rose*, and people are flocking in by hundreds, and if they continue at the same rate for another fortnight, our population will swell very probably to the number of 10,000. Everywhere little bush has its group and encampment for miles around Parkes the district is literally teeming with people. The Serua-nul presents similar appearances, the valleys of this district. The chain of apparently barren hills seems to unite there more prominently than around Parkes, and on their south-western flank

extends the best plain, where the gold is found, and where thousands of people are already settled in three different towns. Every style of business is already represented there—the storekeeper, auctioneer, barber, and butcher. The vast extent of the flat promises to embrace many branches and tributaries, and already some gold is obtained in the eastern part. The lead is about 100 miles from the coast. There has been proved about 15 miles; that is, right to the bank of the Goubang Creek. The width uniformly is about 20 feet, and prospectors may be put down at an average of 1 dw. to this depth, though at Prince's it gave once a 4 oz. 14 dw. to half-dish; at M'Gee's, two benches brought 1 lb. weight of gold; and at Perry's on Wednesday, 1 oz. was washed out. The depth of wash may be varied at 18 inches to 2 feet. See *Specimen List*, No. 3; got a nugget 1 oz. 17 dw. Black ore, No. 5; Messrs. Bonjre and party struck gold—prospects about 3 dw. to three inches, at about 90 feet. M'Gee and party, the second prospectors, seem to have the lead wider, having driven 38 feet north-west; and took about the same wash. When sinking the shaft, the reef was 10 feet above the surface of the fifth shareholder. No. 4, after the third shaft, the prospectors, right on the back of the Goubang Creek, bottomed on Saturday last at 110 feet, 1 foot wash, 4 gals. to the dish, dipping 10° easterly. This depth will prove the ground true on the frontage. The fourth prospectors on the southern side of the Goubang Creek, Messrs. Camba and party, bottomed at 140 feet; plenty of gold, and good prospects. The fifth shaft, sunk on Sunday, 6 gals. full, northwards of the last.

valley, over the easterly ridges, are the Giffengreen hills, promising to turn up some precious metals; the sinking is now over 130 feet. Two miles north-west from the last gully is the Ben Nevis, reports the prospecting party from the Giffengreen hills, where they sank at 35 feet. About three-quarters of a mile east of Four Mile or London. The additional news there was that Nos. 3, 4, and 17 have struck gold prospects, about five grains to each per dish. Messrs. McLeod and Co., who were sent to prospect, report that the lead will prove very likely greatly remunerative. From here come the Young Welcome, where they were once promoted by bad roads from washing, and Frenchman's, where good washings have been found. The place called Dotted Lead, which has about seven miles of road leading westward, has about 7 dwts. to the load; and thence to the North Lead and Shadow Rush are still in the work, as well as the Main Bushman, and given out. The main road is now about half a mile long, and the parties are doing well, and the run seems to be

"We learn from Grentill that the incessant downpour of rain has materially increased the depth of the water, and in consequence we cannot report anything definite in our present issue. M'Mahon and party bottomed at 70 feet, but shallow; they then put a drive, following the dip towards the town, and obtained a depth of 100 feet. The prospects until they came into worked ground, when they commenced driving in the opposite direction, but so far have not met with anything payable. Fogarty and party bottomed at 100 feet, and depth of 120 feet. The constant, on a little gold. The commenced driving towards the main lead, and at a distance of 12 feet obtained 18 inches of washdirt. Kennedy and party bottomed at 14 feet, with a dip of two feet towards the town; they are not sinking a shaft, but another party is working in the same direction. The result of their work is already down 25 feet with it. The result of their work will decide the question as to whether the old lead is continued or not, and their operations are worth great interest in consequence. Brittain and party are working at a distance of 600 yds. of gold - a fair return. O'Brien and party, No. 1 (Tull's claim), Kermode and party, are working here on tribute, and have

about 10 tons of stone for the machine.

holders of the North Coast Lignite Co. has just been held at Harbord and Gorman's offices, where the directors' report, with balance sheet to March 31st, was adopted. Mr. J. R. Cuthell was elected chairman, and Messrs. J. W. Taylor and J. Kinloch were elected directors. The new mine area is being pushed on with all possible speed.

The mining manager of the Vale of Clyde Lignite Co. reports:—"At 8 o'clock this morning we measure the shaft, and find that it is 100 ft. deep. The railway authorities are now moving very slowly, and we are anxious to have been completed some weeks ago. I am happy to say that this month there more coal left the valley than any month since the coal mines were first found out. This ought to be a great encouragement to the Government, as the mines has not sufficient appliances to meet the demand; this is a feature well worthy of notice. It shows that the coals from Liddagow are beginning to be known and its superior qualities are being appreciated by the Government and the Sydney. Only let the Government employ the same methods in proportion to the amount of coal which can be produced with the present labour power, and the Western coal-fields will yet put some of our neighbouring colliers in the shade."

On 26th May, at Government House, his Excellency Sir Hercules Robinson held a levee in honour of the fifty-fifth anniversary of the birth of her Majesty the Queen. The attendance was by no means as numerous as usual. Detachments of police, on horse and on foot, were on duty.

[illegible]

His Honor Sir James Martin, Chief Justice, presided at the following gentlemen on the evening of Tuesday, the 26th May, at an official dinner party in honour of her Majesty's birthday.—The Right Rev. the Bishop of Sydney, Sir Alfred Stephen, C.B., N.C.M.G.; Commanders to the Hon. Henry Parnes, Colonial Secretary; the Hon. J. B. Thorneycroft, President of the Legislative Council; the Hon. C. D. Thompson, M.L.A., Chancellor of the University; the Hon. W. M. A. R. St. George, M.L.A.; the Hon. W. M. Manning, M.L.A.; the Hon. Mr. Justice Hargrave, the Hon. Mr. Justice Fawcett, the Hon. Mr. Justice Ubbels, Captain James Ransome, R.N., H.M.S. Dido; Captain Nares, R.N.; H.M.S. Thetis; Mr. John Robertson, M.L.A.; Mr. H. M. Bailey, Mr. Arthur Hodgson, and Mr. George Dene Thompson.

The commemoration in honour of the fifty-first anniversary of Her Majesty's birth arranged for Monday, the 10th inst., was a day of rejoicing with by the extremely unobscured state of the weather. The day was observed as a close holiday in the city; and in some of the principal squares and streets there were emblematical displays of the royal arms, and the motto, "Dieu et mon droit," the loyalty of the inhabitants. The sea was calm, and the Observatory and the shipping in the port were gayly decorated with flags and streamers. The people were undoubtedly the great attractants, and the thousands of three thousand of the citizens availed themselves of the opportunity of visiting the Observatory, and the numerous trains of boats were present at the review of our citizens. The Mayor, Sir K. Kelly, the Governor and several members of Parliament, were present. Heavy rain, however, fell early in the morning, and the showering rain continued incessant and regular throughout the day that it was hardly possible to go abroad excepting in waterproof garments. The day was, therefore, a day of indoor amusements and experiment, but it was almost at the hazard of their health

A gentleman connected with one of our largest mercantile houses has lately left the colony for a period of absence, and has been enabled to contribute to the cause of the Society by distributing in donations to the following Sydney charities:—The Benevolent Asylum, Home Visiting Society, Sydney Dispensary, Sydney Infirmary, Sydney Hospital, Sydney General Hospital, 450 each; to the Clergy Widows and Orphans Fund, £50; and to the King's School Chapel, £25. He also presented to the Sydney Infirmary, which followed the example of his late excellent father, Mr. John Gilchrist, who in 1855 sent out £1000 to be distributed to the same institution.

The crews of H.M.S. Peel, Challenger, Dido, Confidant, Albatross, and Sandfly were entertained on the 10th ultimo at a tea meeting, given by the committee of the Church of England Society, at the Sydney Infirmary. The proceedings were opened by the Rev. Canon O'Reilly requesting the meeting to sing "grace before tea." After tea was served, the Rev. Canon O'Reilly, who presided, presided presided amongst all present, the Bishop (the president of the society) delivered a short and stirring address, which was warmly received, and in which he alluded to the importance with which it was received. A hymn was then sung, followed by a brief and earnest speech on the benefits of the Society, by the Rev. Canon O'Reilly, who, in the fact of his other having been a naval officer, and that that he felt gratified on all occasions to meet with the members of the Society. After Mr. Foster's speech, the Rev. Canon O'Reilly presented a paper on the subject of the hymn on the hymn.

be a little for some time. On reaching Leichhardt-street the procession turned to the right, and drew up in front of the temporary media, one of the bishops, whose loud and hearty cheering was a revelation to their disciples. When entering the gate Archbishop Vaughan gave the green badge his benediction, and so closed the first day of the proceedings in connection with the opening of St. Stephen's Cathedral."

After the King's School cadets, under Captain H. H. Smith, were dismissed, the 100th Central Postal Directory was seen in high spirits and presented a smart and dignified appearance as they paraded on the platform, each carrying a letter to the front. The 100th's departure and the departure of the 10 colonists was dispatched on Thursday.

During the first day afternoon the camp was enlivened by strains of music from the band of the Southern Rilles, and the 100th Central Postal Directory was seen to have been made for the transit of the up-country troops as they arrived at different intervals in the course of the day. The 100th Central Postal Directory was seen to have been made for the transit of the up-country troops as they arrived at different intervals in the course of the day. [illegible][illegible]

gallanized the men for the care they had exhibited in trying everything "last and true." The batteries of the 1st Cavalry were specially commended for their gallant respect. In the afternoon a considerable number of visitors from Campbelltown and Liverpool visited Campbell Field, and appeared to be much interested in the arrangements. The day fell in for company drill. There was a very fair turning out indeed, the majority of whom were from Liverpool. The bands played for an hour or two, much to the amusement of the country folk to whom military music was probably a novelty.

Monday morning broke more unexpectantly than any day of the encampment. Not only was the cold (as I might have been) the less, but drizzling showers were alternated with sun and showers, the latter being the simplest characteristic. It was therefore anticipated that the attendance of visitors from Sydney would not be so large as might reasonably have been expected. However, it proved to be the contrary, and the attendance was greater, and the influx continued until probably not less than 500 to 600 visitors were upon the ground. This added considerably to the liveliness to the scene. Besides those who came there from Sydney, a large number of visitors

[illegible][illegible]

While the sun shone the view from the hills was most attractive. The opposing forces distributed in various positions, erecting signs and venting air for the feeling of the breeze in a *gust of cheer*, the puff of smoke from the rifles and the field-gun, and the crowds of operators lining the crease of operations in all directions, combined to make up a picture of the most interesting character.

During the morning, the Hons. Henry Parkes, G. A. Hargrave, and J. S. Farrell arrived upon the ground, and were amongst the spectators of the review and watch light.

At 11 o'clock the Hons. Parkes and Hargrave, who had been in the field-gun went away in charge of Lieut-nant Chapman, intending to proceed as far as Liverpool, to arrive in Sydney the following day. The remainder of the day was spent in the review of the various regiments.

The King's School and Grammar School Cadets companies remained in camp all night, and returned by train on the 26th.

The accidents were very few and received every attention.

The field state was as follows:—General staff, 25; Artillery Brigade, 389; Engineers, 52; Brigade band, 31; Infantry Battalion, 342; Suburban, 249; Western, 281; Eastern, 382; Northern, 338; Cadets—King's School and Grammar School, 56; Total, 1778.

The winter season has fairly set in and frosts are common at night time in the country districts. A large quantity of rain has fallen throughout the colony during the past month. Generally speaking, the season is favourable for

[illegible]

califying character. The Riverina country is said to
 have an excellent appearance. On the Murray the coun-
 try looks well. The lambing is expected to be most favour-
 able, and the wool clip promises to be heavy, even heavier
